→Data Cleaning Activities Performed

1. Missing Value Identification

The dataset was examined for missing or null values using Excel filtering techniques.

Findings:

- Missing values were identified in the CouponCode column.
- No missing values were found in the remaining columns.

Action Taken:

- Blank CouponCode entries were replaced with "No Coupon".

Reason:

A blank CouponCode indicates that the customer did not apply any coupon during the purchase process.

2. Duplicate Record Verification

The OrderID column was checked for duplicate entries.

Findings:

- No duplicate OrderIDs were found.

Action Taken:

- No records were removed.

Result:

- Duplicate IDs: 0
-

3. Data Format Validation

The Date column was reviewed to verify formatting consistency.

Findings:

- All records followed the YYYY-MM-DD format.

Action Taken:

- No corrections were required.

Result:

- Incorrectly formatted dates: 0
-

4. Text Consistency Verification

The following columns were reviewed for inconsistent text values:

- PaymentMethod
- OrderStatus
- ReferralSource

Findings:

- All values were already standardized and consistent.

Action Taken:

- No modifications required.

→Final Results

Validation Check	Status
Missing Values Identified	Completed
Missing Values Handled	Completed
Duplicate IDs Checked	Completed
Duplicate IDs Found	0
Date Format Validation	Completed
Incorrect Date Formats	0
Text Consistency Check	Completed

→Conclusion

The dataset was successfully cleaned and validated according to the project requirements. Missing values were handled appropriately, duplicate Order IDs were verified to be absent, date formats were confirmed to be consistent, and text fields were reviewed for standardization.

The dataset is now ready for further analysis and reporting.
